

ABOUT

ABOUT SECTION — Images to Collect

1. “Me Building” — MUST HAVE

Use your photo where you are working on the laptop.

Purpose: Shows you as a developer/product builder.

Best visual:

- You at laptop
- Clean workspace
- Prefer landscape/horizontal
- Minimal background clutter

Use for:

About Me / Developer / Product Builder

2. “I Build With People”

Use your photo where you are discussing the laptop/project with another person.

Purpose: Shows collaboration rather than just coding alone.

Use for:

- Collaboration
 - Client work
 - Teamwork
 - Product development
-

3. “Professional Koushik”

You should have one professional portrait separate from your hero image.

Ask ChatGPT to generate/edit one using your face:

Create a premium professional editorial portrait of me as a young full-stack developer and product builder, wearing a sophisticated dark outfit, photographed in a modern technology studio, cinematic lighting, subtle 3D digital elements in the background, realistic skin texture, confident but natural expression, premium portfolio photography, landscape composition, no text, no logos.

Use for:

About / Profile

4. 🎓 “My Journey”

You already have your journey infographic, so you don't need another personal photograph here.

Use the timeline showing:

Bhashyam → Sri Chaitanya → GITAM → GARRF → Research → Deloitte

This can become a beautiful interactive 3D timeline.

5. 🏆 “Beyond Technology”

Your Kabaddi trophy photo is excellent here.

Don't make this look like a random sports gallery.

Use it to communicate:

Discipline beyond code.

You can have a 3D card that rotates/reveals the trophy photograph.

6. 👥 “Leadership”

Your GARRF Student Chapter Head certificate photo.

Use the horizontal version we generated.

Purpose:

Leadership • Community • Research • Responsibility

WORK

01 — Full-Stack Development

Building complete web applications from frontend to backend.

- React / Next.js
- JavaScript / TypeScript
- Python
- APIs
- Databases
- Authentication
- Deployment

Image: Your laptop/coding photo.

02 — Web & UI Design

Designing modern, responsive interfaces that are both functional and visually engaging.

- Website design
- UI/UX
- Responsive design
- Prototyping
- User-focused interfaces

Image: A screenshot of one of your best website designs.

03 — AI & Automation

Exploring AI to make software and everyday workflows smarter and more automated.

- AI-powered applications
- Automation workflows
- AI integrations
- Intelligent tools
- Experimenting with emerging AI technologies

Image: A 3D AI/automation visual.

04 — Business Websites

Helping local businesses, startups and organizations turn their requirements into useful digital products.

- Business websites
- Landing pages
- Web applications
- Maintenance
- Feature improvements
- Digital solutions

Images: CHAMS Construction + CHAMS Offshore screenshots.

05 — Product Building

From an idea to a working product — understanding the problem, designing the experience, building the software and improving it.

Image: Your collaboration photo + 3D product visual.

06 — Research & Real-World Experience

Applying software and problem-solving skills to real-world projects and research.

GARRF internship — 2025–2026

Research Paper — NIT Warangal, December 2026

Image: GARRF certificate/leadership image or research-related visual.

EXPERIENCE

01 — GARRF.in

Primary CTA

LET'S TALK →

Use a clean contact form:

- **Name**
- **Email**
- **What can I help you with?**
- **Tell me about your project**
- **Send Message**

3D Contact Experience

For your portfolio, make this section more premium with a 3D interactive digital core/orbit:

Idea → Design → Code → AI → Product

As the user moves the cursor, the 3D object subtly rotates and the orbit lines respond. Keep the contact form clean beside it.

Section closing line:

Good ideas deserve to be built.

Let's build yours.
